With so many technologies and apps available, it can be an overwhelming task to figure out what tools will be beneficial to the individual needs of a child. This workshop will provide strategies, resources, and suggestions to help guide parents and caregivers in choosing educational technology tools and applications for their learners.

Participants will discover:

- websites that offer reviews and recommendations by experts, parents, and educators to assist in the selection of high-quality applications that support skill-building, organization, communication, reading, writing, and subject area learning;
- specific tools and features that can be used on devices such as computers, laptops, Chromebooks and smartphones.

ANYONE INTERESTED IN ATTENDING MUST PRE-REGISTER.
