

2465 ACCELERATION

In rare instances, the acceleration of a student (advancement not consistent with the traditional year to year sequence) is in the best interest of an individual student. The process for consideration in these cases must include intensive review of the total student. Intellectual as well as physical and emotional factors must be reviewed prior to reaching a final decision. Acceleration of more than one grade will not be allowed except under extraordinary circumstances.

Exemptions to this policy will be in effect for classified students when grade placement is addressed in the student's individualized educational program.

Final decisions will be made, upon the recommendation of the Superintendent, after notification to the Board of Education.

Adopted: 21 March 2016
